SilvercrowLabs.com, Dallas, TX (Sep 2017 - Present)

Lead Developer. I work with a team of developers, designers, graphic artists, copywriters, and technicians building web and mobile applications, email marketing, and SEO optimization solutions for clients across a variety of industries. We can take low performing businesses and old web sites and turn them into high performing modern business portals.

Blindster.com, Houston, TX (Jan 2011 - Aug 2017)

IT Director. Lead developer, project manager, data architect, webmaster, and Linux system administrator. Early stage employee that helped guide the business through the nascent startup phase to profitability. Stabilized a legacy e-commerce platform to support large volume sales transactions through code and server upgrades. Helped grow revenues from sub \$1M to over \$20M annually in 2017.

Hrsmart Inc, Richardson, TX (Apr 2008 - Dec 2010)

Lead Software Developer. Developed custom software for clients utilizing HRsmart hosted SAS and other third party applications. Utilized the standard toolset / technology stack - see below.

Ondova LLC, Carrollton, TX (Mar 2006 - Feb 2008)

IT Director / System Administrator. Managed systems and applications for a large ICANN domain registrar. Developed back office applications to manage 2,000,000+ domain names and associated DNS, Whois, customer, and billing data. Developed tools and applications to track and monetize advertising revenues. Developed and managed bulk domain registration and maintenance interface to the Verisign NameStore (EPP). Primarily utilized Perl and SOAP interfaces with a bunch of other Python apps.

Education / Certifications

UT / UTD 3 years computer science
NLP Master Practitioner

Standard Technology Stack

I work with an industry standard LAMP stack:

- [PHP7](#)
- [Apache](#)
- [Perl5/6](#)
- [Linux](#)
